Customer Problem Statement Template:

Understanding the customer's challenges is the foundation of developing an effective solution. The **Customer Problem Statement** helps identify the real issues users face in managing their daily nutrition, healthy eating habits, and meal planning. By clearly defining these problems, we can design a solution that addresses user needs and improves their overall health management experience.

For the **Nutrition Assistant** project, the problem statement focuses on helping users overcome difficulties in planning balanced meals, monitoring nutritional intake, and maintaining a healthy lifestyle. The insights gathered from understanding user needs guided the development of a secure, responsive, and user-friendly web application that provides personalized nutrition suggestions and meal planning features.

 I am	Describe customer with 3-4 key characteristics - who are they?	Health-conscious individuals such as students, working professionals, fitness enthusiasts, and people with specific dietary needs who want to maintain a healthy lifestyle through proper nutrition.
 I'm trying to	List their outcome or "job" the care about - what are they trying to achieve?	I want to plan balanced meals, get nutrition suggestions, and track my daily nutrient intake so that I can achieve my health and fitness goals consistently.
 but	Describe what problems or barriers stand in the way - what bothers them most?	It is hard to find time to plan meals, understand nutritional values, or track daily intake. Existing tools are either complicated, not personalized, or do not provide reliable nutrition insights.
 because	Enter the "root cause" of why the problem or barrier exists - what needs to be solved?	Because current solutions lack personalized meal plans, real-time tracking, and user-friendly guidance based on individual health data and goals.
 which makes me feel	Describe the emotions from the customer's point of view - how does it impact them?	Overwhelmed, uncertain, and discouraged, as I struggle to maintain healthy eating habits and see no clear progress toward my goals.
 How might we?	Turn the problem into an opportunity - how might we solve this?	How might we build a personalized Nutrition Assistant that simplifies meal planning, provides accurate nutrition insights, and helps users track their progress easily to maintain a healthier lifestyle?

Example:

 I AM Describe the customer who has the problem. Who are they? A health-conscious individual (student / working professional / fitness enthusiast) who wants to maintain a healthy lifestyle.	 I'M TRYING TO State the problem from the customer perspective. eat healthy, plan balanced meals, get nutrition suggestions, and track my daily nutritional intake.	 BUT Explain what is getting in the way of achieving their goal. it is time-consuming, confusing to calculate nutrition, hard to track daily intake, and lacks personalized guidance.	 BECAUSE Describe the root cause of why this is a problem. existing solutions do not provide personalized meal plans, accurate nutrition insights, real-time tracking, or are not user-friendly.	 WHICH MAKES ME FEEL Describe the emotions that result from this problem. Frustrated, stressed, overwhelmed, and unmotivated to maintain a healthy diet and achieve my health goals.	 HOW MIGHT WE? Turn the problem into an opportunity. How might we build a personalized Nutrition Assistant that simplifies meal planning, provides nutrition insights, and helps users track progress easily?

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A health-conscious student or working professional	Plan healthy meals, receive personalized nutrition suggestions, and monitor my daily nutrition intake.	It is difficult to decide what to eat every day and manually calculate nutritional values.	Most available solutions are generic, require manual effort, and do not provide personalized meal guidance.	Confused, frustrated, and uncertain about maintaining a healthy lifestyle consistently.
PS-2	A user who wants to improve overall health and fitness	Track my daily meals, monitor nutrition progress, and manage my health information in one place.	Managing meal records and tracking nutritional intake is time-consuming and inconvenient	There is no simple, secure, and user-friendly platform that combines meal planning, nutrition suggestions, and progress tracking.	Unmotivated and discouraged because it is difficult to stay consistent with my health goals.
