

Ideation Phase

Empathize & Discover

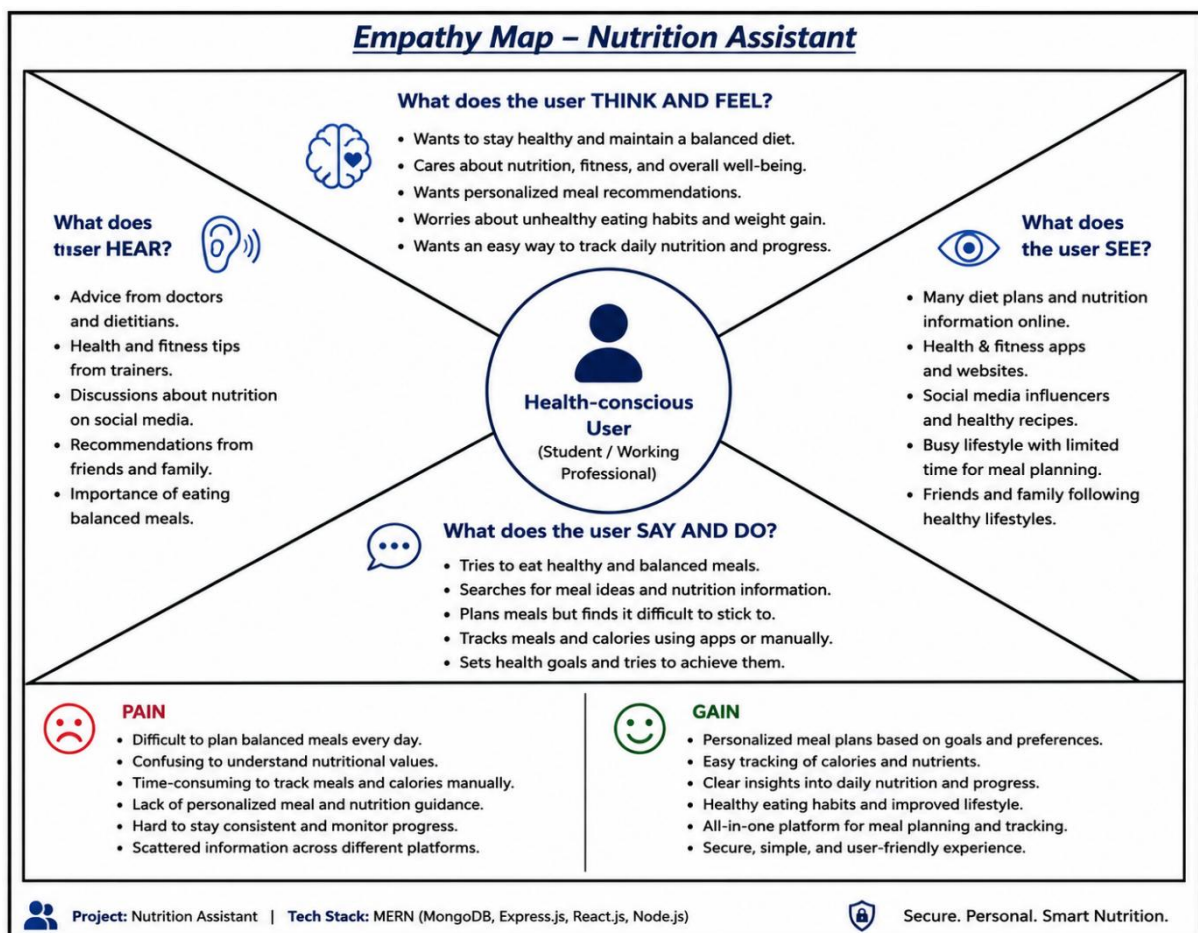

Date	13 July 2026
Team ID	SWUID2026196344
Project Name	Nutrition Assistant
Maximum Marks	4 Marks

Empathy Map Canvas:

An Empathy Map is a user-centered design tool that helps developers understand the needs, behaviours, thoughts, emotions, and challenges of the target users. It provides valuable insights into how users interact with a system, allowing the development of solutions that effectively address their real-world problems and expectations.

For the Nutrition Assistant project, the Empathy Map was created to understand the experiences of individuals who want to maintain a healthy lifestyle but face difficulties in meal planning, nutrition tracking, and making informed dietary choices. These insights helped identify user pain points, motivations, and goals, enabling the development of a personalized, secure, and easy-to-use nutrition management application.
