

Project Design Phase

Proposed Solution Template

Date	13 July 2026
Team ID	SWUID2026196344
Project Name	Nutrition Assistant
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Many individuals find it difficult to maintain healthy eating habits due to the lack of personalized meal planning, nutrition guidance, and an easy way to monitor their daily nutritional intake. Existing methods often require manual tracking and do not provide a simple, centralized platform for managing nutrition effectively.
2.	Idea / Solution description	Nutrition Assistant is a MERN Stack web application that enables users to register securely, generate personalized meal plans, receive nutrition suggestions, track daily nutritional intake, and manage their health information through an intuitive dashboard. The application provides a user-friendly interface for promoting healthier lifestyle choices.
3.	Novelty / Uniqueness	The application combines secure user authentication, personalized meal planning, nutrition suggestions, daily nutrition tracking, and profile management into a single web platform. Its simple workflow and personalized approach make nutrition management easier for users.
4.	Social Impact / Customer Satisfaction	The project encourages healthier eating habits, improves awareness of nutritional intake, and simplifies meal planning. Users can make informed food choices, monitor their nutrition progress, and maintain consistency in achieving their health goals, leading to higher user satisfaction.
5.	Business Model (Revenue Model)	The application can follow a Freemium Model , where basic features such as meal planning and nutrition tracking are available free of charge, while premium features like advanced nutrition analytics, customized diet plans, and expert consultation can be offered through a subscription plan.
6.	Scalability of the Solution	The MERN Stack architecture allows the application to scale efficiently by supporting additional users, integrating AI-based nutrition recommendations, wearable fitness devices, health reports, dietitian consultation modules, and cloud deployment without significant changes to the existing system.
