

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	13 July 2026
Team ID	SWUID2026196344
Project Name	Nutrition Assistant
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Authentication	• Register a new user account • Login securely using email and password • JWT-based authentication
FR-2	User Dashboard	• Access personalized dashboard • View user information • Navigate to application features
FR-3	Meal Planning	• Generate personalized meal plans • Display breakfast, lunch, dinner, and snacks • Calculate nutritional values for meals
FR-4	Nutrition Suggestions	• Generate personalized nutrition recommendations • Display health-related dietary suggestions • View suggested nutrition plan
FR-5	Nutrition Tracking & Profile	• Track daily nutritional intake • View nutrition summary • Manage and update user profile information

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application should provide an intuitive, responsive, and easy-to-use interface for all users.
NFR-2	Security	User authentication should be secured using JWT, and sensitive information should be stored securely.
NFR-3	Reliability	The system should consistently generate meal plans, nutrition suggestions, and store user information accurately.
NFR-4	Performance	The application should provide quick page loading, smooth API communication, and efficient database operations.
NFR-5	Availability	The system should be accessible through modern web browsers with minimal downtime during normal operation.
NFR-6	Scalability	The MERN architecture should support future enhancements, feature additions, and increasing numbers of users with minimal code modifications.
